The Hiroshima Appeal
(Adopted on August 5, 2013)

We, representatives of 5,712 cities from 157 countries/regions around the world, have met at the 8th General Conference of Mayors for Peace held in Hiroshima and engaged in extensive discussions on the theme ‘Toward a World without Nuclear Weapons—Conveying the “Spirit of Hiroshima and Nagasaki” to the World.’

In August 1945, the cities of Hiroshima and Nagasaki were reduced to ruins, in both cases by a single atomic bomb, and more than 210,000 people from the two cities lost their precious lives. The suffering of the atomic bomb survivors—known as hibakusha—from the blast, heat and radiation continues to this day, 68 years later. Having lived through an experience too cruel to be put into words, the atomic bomb survivors have continued to appeal for nuclear abolition and to extend their desire for peace to the people of the world. Their dedication stems from their deep humanitarian conviction that “no one should ever again suffer as we have.”

Mayors for Peace, which feels a strong sense of responsibility to guarantee the safety and welfare of citizens everywhere, empathizes profoundly with the spirit of Hiroshima and Nagasaki in striving for nuclear abolition and peace, and is intensifying its activities to promote the abolition of nuclear weapons by 2020.

“Hiroshima” and “Nagasaki” are names that are now well known throughout the world. However, those states that possess nuclear weapons have turned a deaf ear to the earnest appeals of the hibakusha, and during the Cold War they engaged in a nuclear arms race that eventually increased their number to the current total of nine. While there has been some reduction in the number of nuclear weapons, this has been too slow and inadequate. Today, almost a quarter of a century since the Cold War ended, an estimated 17,300 nuclear weapons continue to pose an intolerable threat to humanity and the environment. With about 2,000 nuclear weapons on high alert, the threatened use of nuclear weapons, euphemistically called “deterrence,” and the unspeakable horror it implies, is still the mainstay of the international security regime. Furthermore, nuclear proliferation remains a current and dangerous threat, and we cannot deny the possibility that a sub-national terrorist group might obtain nuclear weapons.

And yet, in a time of unprecedented global economic crisis, fantastically expensive programs to use new tests to modernize nuclear weapons systems are underway in all of the states that possess nuclear arms, with no end in sight, misappropriating resources that are badly needed to fund basic human needs.

The need to achieve a world without nuclear weapons that will be sustainable over the long term compels us to build a new society in which mutual distrust and threats are replaced by a shared sense of community, rooted in an awareness that we all belong to the same human family. In such a society, diversity will be treasured and disputes will be resolved through peaceful means. The road to this goal may be long and difficult, but it is certainly achievable, and we must proceed with determination. At the same time, while on this path, it is absolutely necessary to prevent the criminal act of another use of nuclear weapons, which would result in unfathomable disaster to humanity and the environment. To this end, concrete policies, frameworks and confidence-building measures to promote international and regional peace and security must be put in place—in particular, in regions such as the Middle East, North East Asia and South Asia, where nuclear tensions are on the rise.

Facing the continuing threat posed by nuclear weapons, we need to redouble our efforts to bring all states to the table to commence negotiations for the complete elimination of nuclear weapons at the earliest possible date. This is the main goal of the Mayors for Peace 2020 Vision Campaign to ban nuclear weapons.

While we acknowledge the many complementary efforts to abolish nuclear weapons, we, Mayors for Peace, place our priority at this stage on promoting a nuclear weapons convention or other effective means of establishing a world free of nuclear weapons. In this context, we welcome several promising new developments that are highlighting the inhumanity of nuclear weapons and accelerating the momentum toward their becoming outlawed. The Final Document of the 2010 NPT Review Conference referred for the first time to the inhumanity of nuclear weapons and a nuclear weapons convention. In March this year, Norway hosted a ground-breaking conference in Oslo on the Humanitarian Impacts of Nuclear Weapons, with 127 governments in attendance. A follow-on conference, hosted by Mexico, is scheduled for February 2014. In May, a new United Nations working group open to all member states began...
(The Hiroshima Appeal continued from page 5) meeting in Geneva “to develop proposals to take forward multilateral nuclear disarmament negotiations for the achievement and maintenance of a world without nuclear weapons.” And the first ever UN High-Level Meeting on Nuclear Disarmament will take place on September 26 in New York.

Mayors for Peace calls on all states, including those that possess nuclear weapons, to participate constructively and in good faith in the new UN working group, the UN High-Level Nuclear Disarmament Meeting, and the Mexico conference on the Humanitarian Impacts of Nuclear Weapons, as well as in preparations for the 2015 Nuclear Nonproliferation Treaty Review Conference.

Along with this immediate campaign, we will also expand our activities to advance the longer-term goal of cultivating the sense of global community as one human family that will ultimately be the basis for lasting world peace.

In order for Mayors for Peace to carry out this ambitious agenda, further expansion of our membership and the development of proactive and independent activities at the regional level are necessary. Further, we need to convince people around the world to actively support the heartfelt desire of the atomic bomb survivors for peace. To raise global awareness as widely as possible about the harsh reality of the bombings of Hiroshima and Nagasaki, especially among future generations, we must strengthen our relationships with the United Nations, parliamentarians, associations of local authorities, the International Committee of the Red Cross, international peace organizations, other organizations working for peace, human rights, and protection of the environment, and prominent figures in culture, the arts, and sports. Our collaborative activities can help to mobilize widespread international public opinion for peace.

By expanding the number of our member cities and deepening the involvement of existing members, and through increased networking with diverse organizations, we will overcome the barriers of mutual distrust based on nationality, race, or religion, and create a security system rooted in a sense of global community as members of the same human family.

In light of the twenty-fifth anniversary of the gas attacks on Halabja and the upcoming commemoration of the centennial anniversary in 2015 of the first use of a weapon of mass destruction on Ypres, Mayors for Peace will use these tragic examples of the use of other weapons of mass destruction to further our goal of a nuclear-weapons-free world.

Mayors for Peace has been a humanitarian organization since its founding in 1982 by the Mayors of Hiroshima and Nagasaki. Cities join first and foremost out of human solidarity with the people of Hiroshima and Nagasaki, especially the survivors of 1945. Membership has grown to 5,712 member cities in 157 countries/regions, and we now represent more than 1 billion people. We shall further enhance our capacity to serve member cities and support their activities, and call upon others to join our efforts to further nuclear abolition and peace. Finally, whatever the source of radiation may be, we must do everything we can to prevent any more hibakusha anywhere.

Mayors for Peace calls on the United Nations and all governments to take the following measures:

1. To make sure that policy makers and officials from governments and international agencies responsible for nuclear disarmament visit Hiroshima and Nagasaki in order to deepen their understanding of the indescribable human tragedy of the atomic bombings, and disseminate the earnest wish of the atomic bomb survivors for the abolition of nuclear weapons

2. To establish policies and frameworks for confidence-building measures among nations to make sure that nuclear weapons will never be used again

3. To aim for the early implementation of a nuclear weapons convention, or other effective means of establishing a nuclear-weapons–free world, and to start concrete negotiations towards its conclusion

4. To actively work on replacing the current security system of nuclear deterrence, which attempts to maintain peace through the threatened use of nuclear weapons, with one rooted in a shared sense of community as fellow members of one human family, taking into account experiences gained by regional communities such as the EU, ASEAN, and CELAC.

Addressing the above points, at its 8th General Conference, Mayors for Peace adopted a dynamic Action Plan for the period from 2013 to 2017. We hereby pledge to make every endeavor to achieve the abolition of nuclear weapons by 2020.

August 5, 2013
The 8th General Conference of Mayors for Peace
Hiroshima

I Purport
Mayors for Peace has been dedicating its efforts to the expansion of its membership in order to develop the 2020 Vision (Emergency Campaign to Ban Nuclear Weapons), a set of guidelines for action aimed at abolition of nuclear weapons by 2020, under the cooperation of ever more cities and citizens worldwide. Currently, 5,712 cities from 157 countries/regions around the world have joined Mayors for Peace, representing one-seventh of the total global population, or one billion people.

As the circle of support for nuclear weapons abolition widens, we witness an accelerating momentum to highlight the inhumanity of nuclear weapons and outlaw them, which is precisely in line with our 2020 Vision in three key areas. Greater awareness of the urgent imperative to abolish nuclear weapons

The international Conference on the Humanitarian Impact of Nuclear Weapons held in Oslo on March 4 and 5, attended by 127 countries, considered both the direct impact of a nuclear explosion upon humanity and the indirect catastrophic impact on the global climate.

Good faith efforts to get negotiations started towards achieving a nuclear-weapon-free world

The 2012 UN General Assembly established an Open-Ended Working Group with a mandate to develop proposals to proceed with multilateral nuclear disarmament negotiations for the achievement and maintenance of a world without nuclear weapons. The Working Groups sessions in Geneva attended by about 70 countries, including many of those allied to nuclear weapon states, as well as international organizations and civil society, started sessions in May to compile a report for the sixty-eighth UN General Assembly Session in September.

Holding the High-level meeting of the UN General Assembly on nuclear disarmament

For the first time ever, the UN General Assembly will hold a high-level plenary meeting at the opening of the UN General Assembly on September 26 to discuss nuclear disarmament. The UN resolution that scheduled this session urges participation at the “highest level”, and Mayors for Peace has been urging the same.

From now on, one of the roles that Mayors for Peace must play is to strengthen the voice of the citizens urging concrete measures towards nuclear weapons abolition to governments worldwide, and to raise the international public awareness calling for nuclear weapons abolition. For this purpose, the expansion of membership in Mayors for Peace and the active development of independent activities at the city, regional, and international level are necessary. In addition to having even more people understand the reality of the atomic bombings of Hiroshima and Nagasaki, and having the message of the atomic bomb survivors, calling for nuclear weapons abolition, be shared by people around the world, it will be necessary to foster public opinion with the cooperation of many groups. Furthermore, it is necessary to strengthen the measures calling on the United Nations and governments of various nations to overcome the barriers of mutual distrust, regardless of nationality, race, religion, as well as building a sense of community, and creating a security system rooted in a feeling of brotherhood as fellow members of the human race.

In addition, the improvement of the financial basis of Mayors for Peace and the Secretariat’s function is also an important challenge.

Based on these considerations, the main projects to be promoted from 2013 to 2017 under the 2020 Vision are as listed below.

II Main Projects
1. Expanding membership and strengthening Mayors for Peace’s management system

1) Expanding membership

i. Calling on non-member cities for membership through various channels

We will call on non-member cities to join Mayors for Peace, not only through the Mayors for Peace Secretariat (hereafter referred to as Hiroshima Secretariat) but through associations of local governments, lead cities, 2020 Vision Campaigners, and other channels.

ii. Calling on capital cities for membership

We will promote the membership of capital cities, which have great political influence.

2) Promoting regionalization and galvanizing regional activities

i. Selection of lead cities and their roles

In order to encourage proactive and independent activities appropriate to each region, we will promote the creation of regional groups. For this end, we will select a number of lead cities, which will serve as chapters for the Hiroshima Secretariat and take the lead in their regional activities. The lead cities are also expected to establish an appropriate system as chapters. Following discussions with candidate cities, the President will select lead cities, which will then identify countries and areas that will join their regional group. Also, when non-executive cities have been selected as lead cities, the cities will be appointed to become executive cities.

ii. Holding of regional conferences by member cities
To stimulate regional activities, lead cities will hold regional conferences to exchange information and determine the content of activities based on regional characteristics.

3) Strengthening information transmission

We will utilize social media to facilitate the transmission of information about Mayors for Peace’s activities and information exchange among member cities.

4) Solidifying the financial basis

i. Fundraising

Mayors for Peace will seek to explore and use better and more effective fund raising strategies to maximize fund raising beyond membership fees, for example, specific events, joint projects with partners and application to funding and revenue giving organizations.

ii. Membership fees

In order to build a system through which all member cities cooperate to support the organization while maintaining membership, each city will bear an annual membership fee of 2,000 yen. Furthermore, we will welcome any voluntary payment of more than 2,000 yen. Cities will not lose their membership automatically if they do not pay the fee.

5) Improving the Secretariat’s functions

i. Receiving of interns, etc.

We will work to improve the functions of the Secretariat through receiving interns from member cities and maintaining information about member cities.

ii. Establishing the positions of Secretary General and Under-Secretary General

The Chairperson and Executive Director of the Hiroshima Peace Culture Foundation will serve respectively as Secretary General and Under Secretary General at the Hiroshima Secretariat.

2. Fostering the international public opinion for nuclear weapons abolition

1) Communication and transmission of Hiroshima and Nagasaki’s messages

ii. Spreading the reality of atomic bombing through holding A-bomb Poster Exhibitions in member cities

Member cities will hold Hiroshima-Nagasaki A-bomb Poster Exhibitions in their cities so that more citizens may deepen their understanding of the reality of atomic bombings and share our strong desire for nuclear abolition. Also, through the cooperation with worldwide peace and war museums, we will disseminate the reality of the atomic bombings. In order to hold an exhibition, cities will apply to the City of Hiroshima, the City of Nagasaki, or the Hiroshima Secretariat for A-bomb posters, etc. as well as carrying out effective promotional activities.

ii. A-bomb survivor testimony through Skype

We will transmit testimonies of A-bomb survivors through Skype connecting venues in member cities and the Hiroshima Peace Memorial Museum.

iii. Promotion of Hiroshima-Nagasaki Peace Study Course

We will encourage colleges and universities in member cities to establish and promote Hiroshima-Nagasaki Peace Study Courses designed to analyze, systematize, and convey the reality of the atomic bombings and A-bomb survivors’ messages to younger generations.

iv. Distribution and cultivation of seeds and seedlings of A-bombed trees

We will distribute the seeds and seedlings of A-bombed trees, which have survived the atomic bombing and are alive today, to the member cities wishing to receive them. They will carry out activities to raise citizens’ awareness for peace using trees, as well as taking care of them as a symbol of peace.

v. Distribution and preservation of the Flame of Peace

We will distribute fire from the Flame of Peace, which will keep burning until all nuclear weapons on the planet are eliminated, to the member cities which are interested in this project. They will carry out projects to raise citizens’ awareness for peace using the flame, as well as keeping it burning as a symbol of peace.

vi. Holding of Exhibition: ‘The Light’ - Portraits of the ‘Hibakusha’

To the member cities wishing to hold this event, we will lend portraits of atomic bomb survivors and their second/third generation drawn by the faculty and students of the Hiroshima City University, as well as descriptions about their A-bomb experiences and wish for peace.

vii. Screening of animated films: ‘On a Paper Crane’ and ‘Barefoot Gen’

To the member cities wishing to hold this event, we will lend animated films for screening, such as ‘On a Paper Crane’, a story about a 12-year-old girl Sadako Sasaki who died due to an A-bomb related disease while folding paper cranes in hope for her recovery, and ‘Barefoot Gen’, depicting a strong-willed boy named Gen who lived through hardship among the ruins of Hiroshima.

viii. Receiving of journalists and peace activists from member cities and diplomats

We will receive journalists and peace activists from member cities and diplomats

missions in Japan in Hiroshima and Nagasaki so that they may understand the reality of the atomic bombings and share our strong desire for nuclear weapons abolition. Following their return to their home countries, we will encourage them to engage in various activities to foster public opinion toward nuclear abolition in their cities.

ix. Receiving of youths and university students to Hiroshima and Nagasaki <new>

We will receive youths from member cities and students from universities which have established the Hiroshima-Nagasaki Peace Study Course so that they can deepen their understanding of the reality of the atomic bombings, and get involved with nuclear abolition activities in their cities. We will provide them with opportunities to participate in peace-related programs, such as listening to an A-bomb survivor’s testimony, interacting with local youths and peace activists in Hiroshima and Nagasaki, and attending a briefing about Mayors for Peace.

2) Cooperation with a variety of groups, promotion of awareness activities

i. Promotion of a resolution for Mayors for Peace initiatives at associations of local authorities around the world

In order to foster public opinion for nuclear weapons abolition on a wide-ranging city and citizen level, we will encourage various associations of local authorities around the world, such as United Cities and Local Governments (UCLG), Council of European Municipalities and Regions (CEMR), United States Conference of Mayors (USCM), Federation of Latin America and Caribbean Cities, Municipalities and Local Government Associations (FLACMA) and Japan Association of City Mayors, to pass a resolution for our initiatives toward nuclear weapons abolition. When a resolution is passed, we will publicize the fact on our website or through a press release.

ii. Strengthening of collaboration with worldwide peace institutes including the Hiroshima Peace Institute and the Research Center for Nuclear Weapons Abolition

We will investigate the possibility of joint projects with worldwide peace institutes including the Hiroshima Peace Institute of Hiroshima City University, and the Research Center for Nuclear Weapons Abolition of Nagasaki University, as well as utilizing their human resources and academic research results as peace research institutions in atomic bombed cities.

iii. Collaboration with the International Committee of the Red Cross (ICRC) and Red Cross/Red Crescent Societies <new>

We will collaborate with ICRC and Red Cross/Red Crescent Societies around the world in order to foster international public opinion toward nuclear weapons abolition through activities such as co-sponsoring A-bomb poster exhibitions, distributing seeds and seedlings of atomic bombed trees, and sharing the fire of the Flame of Peace in the Peace Memorial Park.

We will work to build networks with international peace organizations, peace NGOs, parliamentarians, prominent figures in culture, arts, sports, etc. as well as collaborating with their activities. We will especially strengthen and intensify our collaboration with the Abolition 2000 - Global Network to Eliminate Nuclear Weapons (Abolition 2000) and the International Campaign to Abolish Nuclear Weapons (ICAN).

v. Collaboration with the Peace Boat on the Hibakusha World Tour Project with the theme “I was her age.”<New from 2020VCA>

In collaboration with the peace NGO Peace Boat, we will plan a route for a ship voyage with atomic bomb survivors and youth, coinciding with the 2015 NPT Review Conference in New York, and making stops at member cities on the way from and to Japan. In member cities and New York, we will organize peace gatherings, in which parents with their young children encounter hibakusha who in 1945 were the same age as their child is today and pledge to strive for the abolition of nuclear weapons. Host cities will undertake to promote public awareness of and participation in the gathering with the hibakusha, as well as local, national, and where possible international media attention.

Mayors for Peace poster exhibition was on display at the United Nations Office at Geneva, outside the meeting rooms where the Open Ended Working Group (OEWG) met.

Mayors for Peace representatives participated in the Open Ended Working Group (OEWG) on nuclear disarmament set up by the UN General Assembly [May, June and August, Geneva (Switzerland)]

Aaron Tovish, International Campaign Director of the Mayors for Peace 2020 Vision Campaign Association, and Esteban Ramirez, UN Representative from the association, attended the start of the Open Ended Working Group (OEWG) on nuclear disarmament set up by the United Nations General Assembly amidst growing frustration with the ongoing paralysis of the Conference on Disarmament and insufficient progress towards the achievement of a world free of nuclear weapons. The working group provides a comparatively informal forum for debate and is mandated to “develop proposals to take forward multilateral nuclear disarmament negotiations for the achievement and maintenance of a world without nuclear weapons.”

Besides the interactive format of the working group, representatives from civil society and international organizations have been invited to participate.

On May 15, during the second day of meetings at the United Nations Office in Geneva, Mr. Tovish, speaking on behalf of Mayors for Peace, suggested that “planning in good faith” should be our core guiding concept at this time.” On May 17, in concluding remarks, Esteban Ramirez called on participants to continue to engage openly and creatively.

On August 30, the Open Ended Working Group (OEWG) on nuclear disarmament adopted, without a vote, a report summarizing the “proposals made and discussions held” during its meetings in May, June and August 2013. On August 28, Mr. Esteban Ramirez, UN Representative from Mayors for Peace, welcomed the introduction of the draft report, and stressed “the value and contribution of the OEWG to articulate proposals and clarify positions, broadening the discussion, and promoting participation (including by civil society).” However, Mr. Ramirez noted, “Much more could have and should be done with regards to producing concrete recommendations to the General Assembly to move forward with multilateral disarmament negotiations, in accordance with its mandate.

During the meetings of the Working Group, Mayors for Peace contributed alongside other members of the Abolition 2000 Task Force to the drafting of a Manual for Governments, meant primarily to assist smaller delegation.

Mayors for Peace also submitted a working paper jointly with the Basel Peace Office and the Nuclear Age Peace Foundation on August 22, titled “Contributions from Non-Governmental Organizations, Bridging the gaps - building the framework – ensuring success.”

The number of Mayors for Peace Member Cities reached **6,000** cities in **158 countries and regions** (as of April 1, 2014)

Thanks to your invaluable support, on April 1, we have added 413 new member cities to 5,587 cities as of April 2013, bringing total membership to 6,000.

It took two years and six months to add 1,000 cities since we achieved 5,000 members on September 16, 2011.

The first member city joined in Panama (in July 2013) and in Algeria (in October 2013). This expands our membership to 158 countries and regions.

The most rapid increase of the number of member cities during the period from April 1, 2013 to April 1, 2014 was marked in Iran. As of February 1, 2014, the number of Iranian member cities reached 183 on April 1, 2014, an increase of 156 from 27 as of April 2013. This historical record was achieved by the team of the office for Iranian members of Mayors for Peace based at the Tehran Peace Museum, led by Dr. Shahriar Khateri, 2020 Vision Campaigner. They achieved this by consistently communicating with all the mayors in Iran and asking them to join Mayors for Peace.

The second largest increase in the number of member cities was achieved in Japan, an increase of 137 from 1,302 as of April 2013 to 1,439 as of April 2014.

The third was in Mexico, with an increase of 27 cities from 53 cities as of April 2013 to 80 cities as of April 2014. These membership growth include the results of the cooperation with the Peace Boat as well as invitations to join Mayors for Peace in conjunction with conferences of national associations of local governments.

The forth was in Italy with an increase of 13 cities and the fifth was in the Netherlands with an increase of 12 cities.

We would appreciate your continued assistance with inviting mayors who are not yet members to join Mayors for Peace.
