概要	Hiroshima is not merely a site memorializing its tragic atomic bombing in the last century, but a vigorous city in the new century, where students from diverse backgrounds can come together to study and discuss important issues related to world peace. The need to rethink the legacy of Hiroshima is growing, as serious threats to peace arise. The lectures in this summer course will be given not only by specialists in peace research, but also by policy maker of peace policy of Hiroshima City. In addition to the lectures, the course will feature several special programs: visits to the Atomic Bomb Dome and Peace Memorial Museum, participation in the Peace Memorial Ceremony on August 6th, and discussion with atomic bomb survivors. Both undergraduate and graduate students (in a Master's or Doctoral program) are eligible to earn credits in the course.
到達目標	The aim of this undergraduate course is to provide students with a general understanding of the nature and attributes of war and peace by illuminating various aspects of wartime experiences, including the atomic bombing of Hiroshima, and, at the same time, to explore contemporary issues relating to world peace in a global era. The course will be conducted in English, so the ability to use spoken and written English is essential. In addition to the undergraduate lectures and special programs, graduate students will attend several more advanced lectures and discussion sessions.
